PROFESSIONAL SUMMARY

Enthusiastic software developer with a strong foundation in application design, development, and problem-solving. Experienced in writing clean, maintainable code and collaborating in agile teams. Familiar with AWS, automation tools like Ansible, and containerization, with ongoing upskilling in Terraform, seeking to grow as a well-rounded software professional.

EDUCATION

- Vellore Institute of Technology, Bhopal** Bhopal, Madhya Pradesh
• *Master of Computer Applications; CGPA: 9.05 / 10.00* 2024 – 2026
- The Oxford College of Science** Bangalore, Karnataka
• *Bachelor of Computer Applications; CGPA: 7.78 / 10.00* 2020 – 2023

SKILLS SUMMARY

- **Cloud & DevOps:** AWS (EC2, Lambda, VPC, S3, IAM, ELB, ASG), CI/CD (Jenkins), Docker, Ansible, Terraform
- **Programming & Web:** Python, JavaScript, Shell Scripting, Node.js, Express.js, HTML, CSS
- **Data & Tools:** MySQL, MongoDB, Git, GitHub, GitHub Actions, Postman, VS Code, Jupyter Notebook, Google Colab

EXPERIENCE AND ACTIVITIES

- The Oxford College of Science**
 - *Tech Head – Technical Club*
 - **Technical Workshops & Hackathon:** Organized 4 hands-on technical workshops and 1 hackathon for 150+ students, increasing participation and practical skill development.
 - **Coordination & Operations:** Managed logistics and coordinated with faculty and student teams to ensure smooth execution and high engagement.
- Academic Semester Project**
 - *Team Lead*
 - **Project Leadership:** Led a 4-member team to develop a full-stack web application, coordinating backend, frontend, and deployment tasks.
 - **Agile Practices:** Improved delivery quality through sprint planning, Git-based collaboration, and structured task tracking.

PROJECTS

- **VIT-Bolt – Campus Delivery Platform (Web Development, Backend, Containerization):** Built a campus-exclusive delivery platform with domain-restricted authentication, creating a secure ecosystem and generating local employment by engaging village workers.
Expanded the platform with an on-campus essentials store, boosting utility by 35% and serving as a one-stop solution for daily student needs.
Optimized intelligent order routing and containerized the Node.js and MongoDB stack using Docker and Docker Compose for consistent deployments.
Live link: <https://vit-bolt.onrender.com/>
- **GameZone – Cloud-Hosted Gaming Hub (Cloud Computing, DevOps, Web Development):** Developed an interactive gaming hub with platform-based filtering, real-time ratings, pricing insights, and enhanced game discovery using external APIs.
Built a Jenkins-driven CI/CD pipeline and containerized the application with Docker for automated deployment to AWS EC2. Implemented CloudWatch monitoring with CPU and disk alerts and secured the environment using IAM roles, Security Groups, and Linux scripting.
Live link: <https://gamezone-tmlk.onrender.com>
- **AWS Production-Ready VPC Setup (Cloud Architecture, Infrastructure as Code):** Designed a multi-AZ, production-grade AWS VPC using Terraform with public and private subnets, NAT Gateways, Route Tables, and an Internet Gateway to ensure 99.9% availability.
Deployed an Application Load Balancer with Auto Scaling Groups for fault tolerance and seamless traffic distribution across availability zones.
Secured infrastructure using a bastion host, least-privilege IAM roles, and fine-grained Security Groups for controlled access to private resources.

ACHIEVEMENTS AND CERTIFICATIONS

- AWS Cloud Practitioner Essentials – AWS Training & Certification, completed June 2025
- HackerRank Certifications: Problem Solving (Basic), Python (Introductory), Software Engineering Intern
- Placement Student of the Year (2023) – Awarded for outstanding performance in campus placements
